Education

B.Sc. (Hons.) in Software Engineering
Cardiff Metropolitan University
- Specialized in full-stack development with emphasis on PHP, Laravel, and modern JavaScript frameworks
- Gained comprehensive understanding of DBMS concepts, database schema design, and data integrity principles
- Applied advanced knowledge in RESTful API development and database optimization techniques

Higher Diploma in Computing and Software Engineering
Cardiff Metropolitan University

G.C.E. Advanced Level
ST. Aloysius College - Galle

PROJECTS

Mubarak Products - E-commerce Website   *Role: Full-Stack Developer | Personal Project*

Technologies Used: React.js, Vue.js, Laravel, Tailwind CSS, MySQL

https://github.com/AsyadNazeem/mubarak-product.git

- **Authentication System:** Secure admin login with role-based access control and session management
- **Admin Dashboard:** Complete product catalog management including category, sub-category, and product registration
- **Customer Management:** Contact form handling and customer inquiry management system
- **Frontend Display:** Dynamic product showcase with category-based filtering and responsive design
- **Database Architecture:** Optimized SQL database design for efficient product and customer data management

Medical Consultation Booking System   *Role: Full-Stack Developer | Bsc Final Project*

Technologies Used: PHP, Laravel, MySQL, HTML, CSS, JavaScript, Bootstrap

https://github.com/AsyadNazeem/parkison-disease-app.git

- **User Authentication and Authorization:** Implemented secure login and role-based access control for patients, doctors, and administrators.
- **Appointment Scheduling:** Developed a dynamic booking system allowing patients to view available consultation slots and book appointments accordingly.
- **Doctor Management:** Created functionalities for administrators to add, update, and manage doctor profiles and their consultation schedules.
- **Patient Dashboard:** Designed an intuitive interface for patients to manage their appointments, view medical records, and update personal information.
- **File Upload and Management:** Enabled patients to upload medical reports securely, facilitating better consultation preparation for doctors.
